Summary

A results-oriented UI Developer with 7+ years of experience, seeking a challenging role to leverage strong technical and analytical skills in designing and implementing intuitive user interfaces. Proven ability to collaborate with cross-functional teams and deliver high-quality, scalable web applications, with a focus on Apple ecosystem projects.

Skills

- Programming Languages: JavaScript, HTML/HTML5, CSS, SQL
 - Frameworks/Libraries: Vue.js (2 & 3), Bootstrap, Vuex, Vue Router
 - Tools/Platforms: Git/GitHub, Postman, Jira, Rally, Radar/Quip, Visual Studio, IntelliJ IDEA, Apple Roocode, Code Genius, GitHub Copilot
 - Methodologies: Agile, SDLC, Responsive Design, UI/UX Design, Requirement Gathering
-

Work Experience

Sr Software Associate | Cognizant | Bangalore, India

November 2021 – Present

- Led UI development for high-profile Apple projects (VIMS, DMS, Columba, Core), ensuring seamless user experiences.
- Collaborated with clients and stakeholders for requirements, solutions, and project timelines.
- Designed and implemented dynamic, responsive UIs using Vue.js (2 & 3), Vuex, and Vue Router, optimizing for performance and scalability.
- Translated complex business requirements into technical specifications and UI designs.
- Partnered with backend teams for API integration, ensuring robust applications.
- Provided technical guidance and facilitated code reviews for UI-related issues.
- Participated in Agile sprint planning, task estimation, and backlog prioritization.

Sr Analyst/Software Engineer | Capgemini | Bangalore, India

July 2018 – October 2021

- Developed and enhanced UI components, integrating with backend services.
 - Applied Agile methodologies to design, build, and deploy software, improving efficiency and saving costs.
 - Utilized VS Code, Vue.js, GitHub, STS, Jenkins, Rally, and Oracle SQL Developer for project delivery.
 - Collaborated with cross-functional teams and vendors, ensuring high-quality deliverables.
 - Contributed to all phases of the SDLC, ensuring quality and adherence to timelines.
 - Conducted code reviews and provided constructive feedback to peers.
 - Mentored junior developers, fostering a collaborative team environment.
 - Optimized application performance, resulting in a 15% reduction in load times.
-

Projects

Core (Apple Customer Support Application)

April 2025 – Present

- Developed and maintained the Apple customer support application, enabling advisors to efficiently log customer tickets and issues.
- Analyzed Radar reports to identify UI improvement areas and implemented necessary changes using Vue 3.
- Collaborated closely with backend teams to ensure seamless integration and optimal application performance.

VIMS (Apple Internal)

October 2023 – March 2025

- Architected and developed dynamic and responsive user interfaces using Vue.js (Vue 3), Vuex, and Vue Router.
- Translated complex business requirements into technical solutions, optimizing UI components for performance and scalability.
- Served as the key point of contact for technical queries related to VIMS and DMS, ensuring cross-application alignment.

Columba Application (Apple TV)

July 2022 – September 2023

- Collaborated with product managers, designers, and backend teams to ensure successful project delivery.
- Promoted reusable components and modular design, optimizing development speed and maintainability.
- Converted UI/UX wireframes into high-quality, functional UI components.

Macys (E-commerce Site)

November 2021 – June 2022

GE Aviation DTE NMS (Nonconformance Management System)

June 2020 – October 2021

GE Aviation DTE PCM (Product Change Management)

January 2018 – March 2020

Education

Master of Computer Application | Annamalai University | Bangalore, India

June 2019 – December 2021

Bachelor of Computer Application | KLE'S RLSI | Belgaum, India

July 2015 – May 2018

Achievements

- Ievolve Certificate: Recognized for developing a reusable component for modal, demonstrating innovation.
- Star Award: Awarded for outstanding performance and lasting contribution.
